

Jason Potter

Summary

Jason has over 30 years' experience in the oil and gas industry working on both on and offshore developments, with over 15 years in senior corporate and project roles.

His offshore project portfolio includes large and small topsides, subsea production equipment and numerous subsea pipelines and landfalls; onshore scopes include production fields, processing facilities, terminals, pipelines and process plants. He covers all aspects of a development from bids & proposals, feasibility studies to execution, and his experience includes both office and site-based, offshore assignments and working from client offices both in the UK and overseas.

Career Highlights

Jason has successfully built teams for new office start-ups and enhanced the competences and capabilities of existing engineering delivery teams, both for large organisations and boutique consultants.

His previous role was in a multidisciplinary energy consultancy, where he had responsibility for the commercial performance, business development, resourcing and technical guidance of the subsea team (circa 150+ people).
